

## **President's Message**

Spring 2025

Dear Curly Members,

We at ABC Registry wish to extend our heartiest THANKS to Caren Schumann for all her hard work and dedication to this Registry. She managed the website and the Database with glee, and we are grateful for all her help the last couple of years. Her new job will take up all her time and we wish her well in the new endeavor.

I will be the new Webmaster and the Editor of the Curly Cues. Please send any updates or pictures or stories you wish to see published to my email: jo curlies@hotmail.com

I want to warn everyone that if I do not get much response, I will be pushing my ranch and horse photos and stories along with For Sale ads! Please send photos of your Breeding Stallions along with a nice description and history. I will post your stories in the CC's and Angie can post on Facebook for the Registry. Let's do some promotion of this wonderful breed!!

I plan on attending my Curly mares foaling nights this year. I have never seen one of my babies born, close but usually 20 minutes late. We set up a foaling camera over the stall and I would spend that whole night waking up every 15 minutes and checking the camera online. This year I am planning on being on the scene, I don't want to miss it! We are having a trotting Curly and a Foxtrotting Curly. I am so excited, I can't wait till May!!

Good Luck to all the members, and hope all your Foals are Curly!!

Joan Olson

**ABC** President

# **CURLY HORSE SPOTLIGHT**

Black Rocks Golden Firefly fondly known as O'Sparky shared his curls at the 43rd annual North Texas Irish Festival on March 1, 2025. O'Sparky is a registered Curly Mustang Stallion with ABCR. His partner, Breeann Willich, showed O'Sparky's smooth gait while owner Angie Gaines with Golden Curls Ranch gave a history of curly herd's gathered in Black Rick Hills near Winnemucca, NV by BLM in 2009

## **Historical Curly Pictures**

"I CAN'T BELIEVE I DID THIS!" -- Photo of ND JOKER II ABC-944, owned by Jim Schlueter of Bend OR, and 2nd place winner in our 1990 Photo Contest. Your Editor really cracked up after receiving this second picture just a week after the one on page 7. Unbelievable to receive two almost identical photos in the same contest. Don't you just LUV them?

## **COLOR GENETICS**

## **By Diane Mitchell**

There are 3 base colors: black, bay, and chestnut.

Black=has black eyes, hooves and skin. Black points.

Bay=mixture of red and brown (yellow) with black points (agouti gene).

Chestnut/sorrel-Basically red.

White is actually not a color, but an absence of color. So, a white horse has snowwhite hair, pink skin, and brown eyes.

Brown is not a base color, but a darker version of chestnut. However, some brown horses are so dark, they are considered black.

A dilution gene makes changes (lightness) in color or pattern of the base color.

Add a crème gene and the color becomes lighter. E.G.:

Black + 1 crème gene = Smokey black, + 2 crème genes= Grullo

Bay + 1 crème gene = Buckskin, + 2 crème genes = Perlino

Chestnut + 1 crème gene = Palomino, + 2 crème genes + Cremello

Agouti is a gene that pushes black points to the outside, thus creating black legs, mane tail and black points on the ears. A black with an Agouti gene can appear more like a Bay.

Gray is another dilution factor and is always dominant. The horse may be born a base color but turns gray over time. If they have 2 gray genes they will turn gray quicker that those with 1 gray gene. A dapple gray is a gray that hasn't finished graying out yet.

Dun is a dilution factor, shown by a definite dorsal strip from end of mane to tail. The Dun may have 'zebra stripes' on the legs, black mane and tail. But it MUST have the dorsal stripe. If it doesn't have the dorsal stripe, it's not a Dun. A Bay with the Dun gene can look light like a Buckskin, but again, has the dorsal strip. S Sorrel with the Dun gene is called a Red Dun.

5

The Appaloosa pattern is a Dominant pattern.

## **Genetic Typing**

By Mary Worley 3rd year A&M vet student

Each DNA stand of genes is made up of an outer "rib" and 4 different bases: T, C, A, G.

DNA is double-stranded, doesn't change within the individual. RNA is single-stranded and can change.

What you see (traits) is dependent on how they match up.

A gene is 1 chunk of DNA for a specific trait. There are 2 alleles in each gene. *Homo* means they are the same type. *Hetro* means they are different. *Dominant* means they are expressed (seen). *Recessive* means they are hidden. *Codominance* means both alleles are dominant and expressed. *Dominance Variance* influences the dominant trait. *Epistatic Variance* has more influence on the dominant trait.

## **ABCR CURLY HORSE BREED STANDARDS**

#### **Body Conformation**

- -A medium size head with well-defined jaw and throatlatch
- -Wide set eyes with eyelashes that curl up
- -Ears that are short to medium in length with curls inside (ear hair does not totally shed out in the summer)
- -A medium length neck, deep at the base of the neck where it joins the base of the shoulder
- -Noticeably short back, deep through the girth
- -An appearance of a long under line and the belly cut high in the flank
- -Heavy boned legs and short cannon bone as compared to the forearm
- -Medium withers and a flat croup with a shallow slope to the base of the tail

#### **Curly Characteristics**

- Body (Fine, soft hair)
- -Ringlet (can be several inches long)
- -Marcel Wave (deep soft wave in the body coat)
- -Crushed Velvet (soft dense pile of curls in body coat)

#### Mane (Extra fine hair)

- -Kinky –preferable
- -Wavy
- -Should shed all or partial in the summer
- -Split mane (hangs on both sides of neck)

#### Tail

- -Ringlets
- -Wavy

-Should shed partial at the head of the tail in the summer of some horses may shed tail completely

#### Fetlocks

- -Curly -preferable
- -Wavy
- -Should shed in summer but still retain some long hairs

#### Hooves

- -Almost perfectly round in shape
- -Very hard and dense
- -Proportioned to the size of the horse

#### Size and Weight

- -Average-15 hands
  - -Average weight-800 to 1000 pounds

#### **Unique Characteristics**

- -Curly coat can be hypoallergenic (the horsehair is round instead of flat and testing has shown the hair is closely related to mohair)
- -Can completely shed the mane and/or tail in the summer, only to grow back in the fall with the winter coat. -Noticeably short, strong back, sometimes indicating five lumbar vertebrae
- -Even-tempered disposition
- -Quick pulse and respiration recovery
- -Very dense bone in the legs

**CURLY CUES** 

## **ABCR CURLY HORSE DATABASE** "FREE TO ABCR MEMBERS"

ABCR provides a fully linked ABCR Curly Horse Studbook ONLINE with more than 8,100 entries and 2,950 pictures including all ABCR horses. These are the features of this database:

- 1. Fully linked PEDIGREES WITH PICTURES
- 2. SIBLINGS VIEW: Find full and half siblings of a given ABCR animal at-a-glance
- 3. OFFSPRING VIEW
- 4. VERTICAL PEDIGREES: Vertical pedigrees list full siblings of each horse in the pedigree at-a-glance, which as a group represent various combinations of their parents' genes, and are good indicators of the range of possibilities that are likely to be passed on. Using vertical pedigree analysis gives breeders interesting insights e.g. about confirmation or the extreme characteristics that cannot be tracked in a direct manner.
- 5. REVERSE PEDIGREES: Reverse pedigrees show offspring of the offspring of a given animal.
- 6. TRIAL MATING: Try out mating's between ABCR horses and look how the confirmation or other characteristics would match.
- 7. Additional information such as COEFFICIENT OF INBREEDING (COI) and PEDIGREE QUALITY
- 8. Indication of DNA AVAILIABILITY and EXTREME CHARACTERISTICS
- 9. NAME GENERATOR: Generator for horse names based on more than 40 years of ABCR Curly Horse names-always new and fancy combinations, fun guaranteed!
- 10. ADDITIONAL FEATURES: Advanced Search, Fully scalable between 3 and 8 generations, same ancestors highlighted, enlargeable pictures
